leakSMART®

Master Distributor

LeakSmart is leak and flood protection solved

LeakSmart protects your home from water damage 24/7 with smart home technology that detects water leaks, alerts the home owner, and shuts off the main water supply automatically to prevent any further damage—even if disaster strikes and Internet is down. What's more, you can monitor temperature and turn your water off from anywhere in the world via the LeakSmart App, keep you in constant control of your home's water flow.

Place LeakSmart Sensors where leaks may occur.

Complete Home Water Protection System & Accessories

Automatic Shut-Off Valve

Automatically turns off the main water supply in your home in less than 5 seconds. Available in sizes from 3/4" to 2". Valves are Lead Free.

Sensor - Model# LS8850600

When paired with the system, each LeakSmart Sensor is designed to signal your LeakSmart Valve to automatically shut-off your water the moment a potential leak is detected. Also provides an audible and visual alarm.

Can also be used without the LeakSmart Valve to alert you to a potential leak and sense temperature.

LeakSmart Snap- Model# LS8852000

LeakSmart Snap snaps on in seconds on any kind of ball valve or gate valve. No tools required. Industrial Strength quality and will open and close the oldest valve.

Complete Home Water Protection System & Accessories

System Hub 3.0 - Model# LS8850830

Once connected to your router, the System Hub allows users to access their system and sensors via the LeakSmart App. Users can view their system, shut off their water and it can connect to other Smart Home platforms.

The System Hub 3.0 does not need to be plugged into your router and will connect to it via Wi-Fi.

System Hub 2.0 - Model# LS8850800

Once connected to your router, the System Hub allows users to access their system and sensors via the LeakSmart App. Users can view their system, shut off their water and it can connect to other Smart Home platforms.

Sensor Range Extender (optional) - Model# LS8850700

The Extender will boost weaker signal strength and ensure communication among your LeakSmart devices. Used when a LeakSmart Sensor indicates a signal strength of one bar or less.
